

Feline Weight Loss Program Progress Chart*

Client Name: _____

Date: _____

Patient Name: _____

*Based on Waltham's Weight Loss Program

1. Enter your cat's starting weight in the space provided.
2. Calculate target weight = (Current weight x 0.85).
3. Enter target weight in space provided.
4. On the vertical axis fill in the weight increments needed to reach the target weight.
5. Weigh your cat weekly and record on the chart.
6. If your cat requires further weight loss after the first cycle, repeat the procedure and set the new target weight for the next cycle.

Recommended Daily Calorie Intake for Weight Loss
